

# Not a *Panda!*

Is this the nose  
of a panda?

Not a panda!

It sniffs a lot of smells just like a panda. And twitches back and forth with each new smell it smells. But is it sniffing things in a jungle or in a house?

This is a panda!

Is this the foot of a panda who  
walks through the jungle or  
zoo?

Definitely not a panda! She's  
asleep on a couch!

**This is a  
panda!**

This little puppy is black and white like a panda and has a black nose and four furry paws. But she doesn't live in a jungle or eat bamboo. She likes to cuddle with her human family and likes to sleep on the couch or in her bed.

A puppy named  
Selbu!
